

Organising the learning process of students in physical education and sport universities in USA

Edgard Eduardovich Mozhaev^a, Eduard Lyutsianovich Mozhaev^b

Federal Government Budget Educational Institution of Higher Education Volga Region State Academy of Physical Culture, Sport and Tourism, Kazan, Russia

This article is dedicated to organizing the process of study of students in physical education and sport universities in USA. In the process of integration of the Russian educational system to the world-wide community it is important to understand all components of foreign educational systems and to introduce its positive sides to the Russian educational system. In this article the United States Credit System – USCS is shown, which is the feature of educational system in USA. This unique system gives the students the great opportunity to study by the individual chosen program, which is unique for every athlete and kind of sport. Also the next feature is the system of national scholarships, which gives great motivation.

The unique system of rewards (sport-scholarship) and credit hours allowed American higher educational establishments certain advantages. The American system of credit hours is a harmonious and logical system of education. This system is capable of providing high-quality education and a solid foundation for the integration of countries into the world educational process: it is a good basis for the recognition of documents on higher education within the national system of higher education.

Keywords: credit system, physical culture and sport education system in USA, bachelor, sport-scholarship.
